# Andrew T. Price II

Information Security Analyst | IT Specialist | Heavy Integrated Avionics Technician

*Albuquerque, New Mexico | 505.918.2573 | Aprice226@outlook.com | linkedin.com/in/andrew-price98*

*Active DoD Secret Security Clearance | CompTIA Security+ (DoD 8570 IAT Level II / 8140 Baseline)*

## Professional Summary

Security+ certified technical professional with an active Secret clearance and 5+ years troubleshooting and integrating mission-critical avionics on AC-130 and C-130 special operations aircraft. Combines a BAS in Cybersecurity, a U.S. Department of Labor registered Full Stack Development Apprenticeship (React, Node.js, JavaScript), and hands-on Active Directory and Windows endpoint support. Known for root cause analysis, workflow standardization, and training technical teams in highly regulated environments.

## Technical Skills

- Avionics & Systems Maintenance: LRU fault isolation, MIL-STD-1553 & ARINC 429 databus, schematics & wiring diagrams, ATE, oscilloscope & multimeter diagnostics, wire harness repair, IPC/J-STD soldering, TO compliance, QA audits
- IT & Infrastructure Support: Active Directory, Microsoft 365, Windows & Linux, endpoint support, user provisioning & permissions, network fundamentals, technical documentation
- Software Development: JavaScript, React, Node.js, HTML/CSS, Python, Java, SQL, PowerShell, C++, Git/GitHub, Agile/Scrum
- Security & Compliance: CompTIA Security+, NIST 800-53 & RMF fundamentals, IAM/OAuth concepts, secure coding, AWS/Azure fundamentals, Docker, risk management
- Leadership & Operations: Technical training, team leadership, process improvement, root cause analysis, cross-functional collaboration

## Professional Experience

**Full Stack Development Apprentice** *Creating Coding Careers — U.S. Department of Labor Registered Apprenticeship | August 2026 – Present*

- Building and testing responsive full stack web applications with React, Node.js, JavaScript, HTML, and CSS through a U.S. Department of Labor registered apprenticeship.
- Applying cloud fundamentals (AWS/Azure), Docker, SQL database design, and OAuth/IAM authentication concepts, with an emphasis on secure coding practices.
- Working in an Agile/Scrum environment — stand-ups, sprint planning, code reviews, and Git/GitHub version control — while debugging front-end and back-end code.
-

**Heavy Integrated Avionics Technician** *U.S. Air Force, Kirtland AFB, NM | January 2023 – Present*

- Led a 12-member team maintaining integrated avionics on AC-130 gunship and C-130 special operations aircraft, sustaining a 98% mission-capable rate and 100% on-time launch capability.
- Performed component-level LRU fault isolation and MIL-STD-1553/ARINC 429 databus troubleshooting using wiring diagrams, schematics, ATE, oscilloscopes, and multimeters.
- Directed installation, configuration, and troubleshooting of next-generation avionics hardware and software suites.
- Managed Active Directory accounts and provided Microsoft 365 and Windows endpoint support, including provisioning, permissions, and workstation troubleshooting.
- Developed training curricula and standardized maintenance workflows, driving a 20% productivity increase; partnered with engineering units to cut annual operational costs by 15%.
- Maintained a 98% compliance rating across quality assurance audits through strict adherence to technical orders and safety protocols.

**Instrument and Flight Control System Technician** *U.S. Air Force, Hurlburt Field, FL | January 2021 – January 2023*

- Maintained and troubleshot instrument and flight control systems on AC-130 and MC-130/HC-130 aircraft, performing LRU- and component-level fault isolation and root cause analysis to eliminate recurring failures.
- Fabricated, repaired, and tested wire harnesses and connectors, soldering to IPC/J-STD standards and verifying circuit integrity through continuity and functional testing.
- Mentored junior technicians on diagnostic procedures and collaborated with engineering units to reduce system downtime.
- Enforced technical order and safety compliance in support of quality assurance audits, achieving zero preventable incidents.

# Education

**Bachelor of Applied Science (BAS) in Cybersecurity** *American Public University System, Charles Town, WV | 2020*

**Associate of Applied Science (AAS) in Aviation Maintenance** *Community College of the Air Force, Maxwell AFB, AL | 2020*

# Certifications & Clearances

- CompTIA Security+ — satisfies DoD 8570 IAT Level II / DoD 8140 baseline requirement
- Active DoD Secret Security Clearance
